

K-Love serves my family as a resident of the local community by being played in some of our restaurants like Chick-Fil-A and sometimes it is played in our Wal-Mart and it is reaching people that are not Christians and it lets them know that there is a God.

If K-Love is put on the LPFM it would devastate our community as well as my family. We ONLY listen to K-Love on ALL our radios in our cars, home and computers. My 2 year old son is starting to sing some of the songs that are played because this is all that he has known. I DO NOT want my children to have to listen to secular music it is awful and does NOT have a positive family friendly music and people as K-Love. I believe that the service provided by K-Love is used as a ministry to reach not only the saved people but the ones that do not know Christ. If you make this the low power FM then where I live we will not be able to listen because of the low power and you would be taking this away you are taking away our freedom of choice to choose what we would want to listen to and making us listen to others.
